

DATA SHEET: **NUVO™ Ceilings (Metal)**

Materials

Aluminum Sheet: 3003-H14 alloy (Standard) or 5005-H34 alloy (For use with anodized finishes).

Typical minimum thickness 20 Ga. (.032" / 0.8 mm)

Stainless Steel Sheet: Type 304 (Standard) or 316 (For higher degree of corrosion resistance). Minimum gauge 22 Ga. (.031" / 0.8 mm)

Galvanized Steel Sheet: Satin Galvanized (galvanneal), Typical minimum 24 Ga. (.028" / 0.7 mm)

Finishes

Aluminum: Baked polyester powder, or two or three coat fluoropolymer coatings by PPG® or Valspar®. Class I or II anodic finishes.

Stainless Steel: Satin brush # 4, Mirror # 8 or other readily available finishes for example, Non-Directional Brush or Random Swirl.

Galvanized Steel Sheet: Baked polyester powder.

Dimensions

Metal Ceiling Panels are typically supplied up to a maximum of 16 square feet, for example 2' x 8' or 4' x 4'.

Designs

Nelson offers a complete line of lay-in, clip-on (Torsion spring), hook-on and tab-and-slot type systems.

Acoustics

Metal Ceilings are available both non-perforated (non-acoustic) and perforated (acoustic). Perforation patterns are limited only to the type of material and gauge chosen and available tooling. Presently Nelson offers more than fifty different perforation patterns ranging from diagonal (45-degree), staggered (60-degree) to straight as well as round, square and oblong holes.

Our standard acoustical material consists of a Black pre-laminated fleece (SoundTex®) bonded to the concealed face of the ceiling panel.

For more details and options contact your local Nelson Sales Representative or call our office at **1-800-277-6897**
